

Out of This World

Areas of Learning

As Writers we will be creating mnemonics to help us remember the order of the planets as well as writing biographies about the British astronaut, Tim Peake.

As Scientists we will be exploring the Earth, Sun and Moon, as well as the movement of the planets in our Solar System. We will also be learning about the Earth's rotation and how this explains day and night.

As Historians we will be learning about famous astronauts and the attempts to reach space.

As Musicians we will be listening to the 'Planet Suite' by G.Holst and devising our own composition based on the 'Mars' movement. We will look at its unusual time signature and consider dynamics, tempo, timbre and pitch.

As Artists we will be experiencing a variety of mediums to create detailed pieces of art based on the moon.

Enterprise

As enterprising people we will:
collaborate when investigating the effects of different forces.

Global Citizens

As global citizens we will:
consider the impact of space travel on our planet and solar system.
We will also realise the global importance of space exploration.

Well Being

As people concerned with well being for all we will:
reflect upon the emotional journey that space explorers and their families go through.

Communities

As members of a community we will:
consider the impact that space explorers have had on our planet and in particular our nation.
