

Connaught half term project

Nature watch and wildlife
photography

Nature watch and wildlife photography

- A fun project idea for half term could be nature watching and wildlife photography.
- You could take pictures of birds, trees, interesting plants or even other animals!
- Ideas include taking the photos in your garden, your local neighbourhood or whilst out on a family walk.
- This project idea is a great way to expand your knowledge of nature whilst getting outside in the fresh air.

Examples

- Here are some examples of bird pictures that were taken recently in our garden:

Robins

Red Kite

Sparrowhawk

Nuthatch

Examples

- Here are some examples of flowers taken in our garden:

Hellebores

Snowdrops

Hellebores

- Why not keep a record of all the different birds, animals and plants that you spot?
- If you don't recognise them, you could research online to try and identify their species.
- Good luck and enjoy nature spotting in your half term!
